

SMARTWALK® TX

PEDESTRIAN MOTION SENSOR for Trail Occupancy Detection

ENGINEERED FOR MOTION

DESCRIPTION

As the newest member of MS Sedco's SMARTWALK® family of pedestrian sensors, the TX features software optimized for pedestrian motion detection in trail crossing applications.

The SMARTWALK TX can be used to improve safety at trail crossings, activating the warning lights only when a trail user is present. Once the warning lights have been activated and the timed cycle begins, the unit can allow the lights to continue flashing as long as it detects pedestrians in the targeted area on the trail. The SMARTWALK TX may be used in tandem with the SMARTWALK XP, using the XP to provide presence detection at the roadside.

The SMARTWALK TX's low power requirements make it ideal for solar applications. The unit is designed to detect trail users, including bicyclists and roller-bladers, up to 60 feet away.

SMARTWALK TX SPECIFICATIONS

PHYSICAL:

- Physical Dimensions: 4"W x 4"H x 7"L
- Enclosure: Powder Coated Aluminum
- Weight: 4 lbs.

OPERATING:

- Operating Frequency: 24.125 GHz (K-band)
- Detection Method: Microprocessor Analyzed Doppler Microwave
- Detection Pattern: Adjustable with cover off
- Detection Angle: Adjustable
- Detection Mode: Selectable: approach-only, depart-only, or bidirectional motion
- Call Extension Time: 0.1 to 25 seconds
- Power Requirements: 12-24V AC or DC ± 10%
- Power Consumption: 2W Max.
- Relay Output: Form C, rated at 1 Amp @ 24V DC (N.O. and N.C.)

- Output Power: 5mW typical, 2mW minimum
- Relay Contact Ratings: 0.5A:50V AC
1A:24V DC
- Temperature range: -29.2°F to 165°F
(-34°C to 74°C)

PERFORMANCE:

- Specifically designed for trail crossing applications
- Reliably detect bicyclists, skaters, runners and walkers
- Low power requirements - ideal for solar applications
- Increase the effectiveness of warning lights by only activating them when trail users are present
- Installs and aligns in minutes
